Disposal Site Evaluation and Selection Process

SPRING 2011

Identification and Screening	Disposal Site "Working List" for FS	FS Screening	FS Detailed Evaluation	EPA Proposed Plan and ROD	Remedial Design and Remedial Action
Identification of possible disposal sites near the harbor and operating regional commercial landfills.	EPA and LWG screened list down to likely disposal sites - based on general feasibility and likelihood of site availability.	Further evaluate and screen list based on effectiveness, implementability, and cost screening criteria.	Evaluate disposal sites to FS comprehensive cleanup alternatives. Sites not selected at this point.	EPA selects a comprehensive alternative.	Remedial designs identify most applicable disposal site(s) based on cost and cooperation with disposal site operators.
100s of Sites	14 Sites	5 upland commercial sites and 3 potential local sites	Upland and local sites	Final set of options both upland and local	Specific site selected for each remedial design
Completed in 2004	Completed in 2009	Completed in 2010	Due to EPA in 2011	After Community Review and Acceptance	Pre-construction phase of cleanup
