

# EPA Portland Harbor Public Forum Gasco Sediments Site

presented by

Bob Wyatt, NW Natural

June 13, 2018

# Gasco Sediments Site Location

The Gasco Sediments Site is centered around River Mile 6.5 on the west shoreline of the Willamette River

## LEGEND

-  Portland Harbor Study Area
-  River miles
-  Navigation Channel

# Site Regulatory Coordination History

- 2000** – Portland Harbor Superfund Site added to EPA's National Priorities List
- 2004** – NW Natural entered into a site-specific order with EPA for removal action
- 2005** – Gasco surface tar feature removed
- 2009** – NW Natural entered into a site-specific order with EPA for Gasco remedial design
- 2012** – Engineering evaluation of Gasco cleanup options submitted
- 2017** – EPA Record of Decision (ROD)
- Current to 2020** – Pre-remedial investigation and design process

# Current Project Status Overview

- NW Natural and EPA are currently working through the pre-remedial investigation and design process.
- Estimated final remedy design completion in 2020.
- Cleanup will start after EPA and NW Natural sign a consent decree.

# Pre-Remedial Investigation and Design Process

## Pre-Remedial Investigation and Design

- Pre-Remedial Basis of Design Technical Evaluations Work Plan
- Pre-remedial design data gaps investigation
- Sediment remedy basis of design technical evaluation memoranda

## Remedial Design

- Preliminary Design Report
- Interim Design Report
- Final Design Report

# ROD Technology Assignments
